# About ICD-10

## ICD-10

ICD-10 is an upgraded diagnostic and procedural medical coding system that, by law, must be implemented throughout the healthcare industry by October 1, 2014. This new coding system is radically different from the version currently in use, so it's important to start preparing for and implementing the massive changes to the existing coding system.

This online program offers you comprehensive, robust training in diagnostic and procedural coding, using the ICD-10-CM (diagnostic) and ICD-10-PCS (procedural) coding manuals. This training includes detailed instructions for using the coding manuals, understanding the coding guidelines, and accurately applying the ICD-10 coding steps.

### The program includes:

- 01** An overview of the objectives, edits, and changes within the soon-to-be-released International Classification of Diseases, 10th Edition (ICD-10).
- 02** In-depth, comprehensive training in using the ICD-10-CM and ICD-10-PCS coding manuals, guidelines, instructional notes, conventions and coding steps.

### Vista College India's ICD-10 training program.
